

Bottmedical announces collaboration with Minilu @ IDS

Bottmedical's presence at IDS (14– 18 March), the biggest dental trade show in the world, marked an important milestone for the company's development. Having the opportunity to show our technology to some of the world's biggest dental players has truly been an amazing experience.

Over the 5 days, we:

- Gave 6 presentations, highlighting the story and benefits of our antibacterial technology system
- Welcomed more than 400 people at our booth, who learned about our CINNA braces
- Gave away more than 300 sample CINNA care solution bottles

At IDS, we were happy to partner up with “Die Grüne Praxis”, the quality label recognizing sustainable dental practices, and Minilu, a big German distributor of dental products.

From today onwards, our products are also available to buy via the Minilu website. They even have test packages, so you can try out the latest in invisible brace technology in the matter of a few days.

In case you want to partner up or want more information about our platform technology, please contact us via contactus@bottmedical.ch.
